

10 Gigabit Multimode Fiber Standard

Overview

The 10 gigabit module standard is the Enhanced Small Form-factor Pluggable transceiver, generally called SFP+. To implement different 10GbE physical layer standards, many interfaces consist of a standard socket into which different physical (PHY) layer modules may be plugged. In SMF light follows a single path through the fiber while in MMF it takes multiple paths resulting in differential.

10 Gigabit Multimode Fiber Standard

10Gtek Fiber Patch Cable

STANDARDS COMPLIANT - TIA/EIA 568-C.3 / 604-10 / 492AAAA, IEC60793-2-10 A1b, CE and RoHS. WIDE APPLICATION - works with all brands of multimode SFP transceivers and fiber optic networks.
