Laser Line Polarizing Beamsplitter Cubes- JCOPTIX MALL

In the beam splitting cube of JCOPTIX, there is a clearly visible point as a marker on the prism with a beam splitting film. The incident light should enter the prism through a sloping surface with a beam

Cube Beamsplitters

Cube Beamsplitters are a type of Beamsplitter used in many life science or laser applications. Cube Beamsplitters are used to split incident light into two separate

[Contact Us](#)

Femtoline Laser Beamsplitters

EKSMA OPTICS offers laser beamsplitters of UV grade Fused Silica. The sizes of laser beamsplitters are: 12.7*3 mm, 25.4*3 mm, 50.8*8 mm.

Beam Splitters

When working with lasers, it is often necessary to split a laser beam into two or more defined partial beams. There are a variety of beam splitters for these applications, with different advantages and

[Contact Us](#)

Optical Beamsplitters

Thorlabs offers a wide range of optical beamsplitters. Our plate beamsplitters have a coated front surface that determines the beam splitting ratio while the back

Beam Splitters - optical power splitter, beamsplitter, thin

Beam splitters are devices for splitting a laser beam into two or more beams. There are different types, including polarizing and non-polarizing versions.

[Contact Us](#)

Beamsplitter lenses

When integrated into specialised lenses, the beam splitter divides the incoming light into two paths: one beam illuminates the object, while the other is used for image

[Contact Us](#)

Beamsplitters

Beam splitting cubes, also known as beam splitters, are optical devices used to split a beam of light into two separate beams. These cubes typically consist of two
