

192 optical cable diameter

Overview

For outdoor use in structured (data) wiring systems such as industrial backbone, campus backbone, building backbone (riser) and/or horizontal cabling. The loose tube gel-free design is fully waterblocked using craft-friendly, water-swallowable materials, which means cable access is simple and no clean. AllWave+ Fibre offers the exceptional performance of our AllWave Fibre specifications along with a 40% smaller minimum bend radius, a 50% lower bend loss and a 33% improved polarization mod dispersion (PMD) link design value. Two ripcords provided beneath the sheath for easy removal This loose tube dielectric optical cable is designed for external underground installations in ducts or by direct burial. GRP armour provides rodent protection and polyamide provides anti-termite protection. Fiber indoor cable, Low Smoke Zero Halogen Riser MPO Trunk, 192 fiber multi-unit with 24 fiber subunits, Singlemode G. A1, Feet jacket marking, Yellow jacket color, B2ca flame rating Finish making your selections or clear them to view relevant specifications. Outdoor dry core optical fiber Multi Loose Tube cable with aramid yarns as strength member, polyethylene inner jacket, Corrugated Steel Tape (Full Rodent Protected) armor and polyethylene outer jacket.

Cable Datasheet

This loose tube dielectric optical cable is designed for external underground installations in ducts or by direct burial. GRP armour provides rodent protection and polyamide provides anti-termite protection.

FREEDM® Loose Tube, Gel-Free, Interlocking Armored Cable, Riser 192

Corning FREEDM® loose tube gel-free interlocking armored cables are flame-retardant, indoor/outdoor, riser-rated cables for interbuilding and intrabuilding backbones in aerial, duct and riser applications.
