

485 signal to fiber optic single-mode

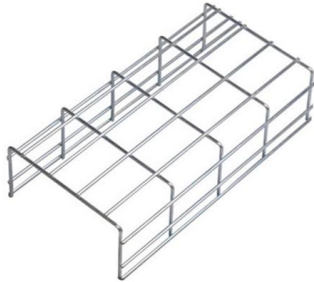

Overview

The DL485 is a RS485 2-wire to singlemode fiber optic converter for point-to-point connections. BIDI technology means that you need only one fiber for transmitting and receiving of the data. Moxa's industrial-grade serial-to-fiber optic converters can convert RS-232/422/485 to optical fiber, which provides users with an easy and reliable way to communicate with their serial devices.

485 signal to fiber optic single-mode

RS485/422/232 to FC Single Mode Simplex (Pair)

Description This media converter is designed to provide a reliable and efficient solution for converting RS485/422/232 signals to fiber optic cable over long distance (max range 20km). This media
