

Applications of Eye Surveyors in the Telecommunications Industry

Overview

Eye tracking is the process of measuring where one is looking (point of gaze) or the motion of an eye relative to the head. Researchers have developed different algorithms and techniques to automatically track.

Applications of Eye Surveyors in the Telecommunications Industry

Telecom Site Survey Engineer Jobs, Employment , Indeed

Required skills/qualifications Familiar with outside plant telecommunication principles. Fluent in Microsoft Office applications such as Word, Excel and Outlook. Familiar with AutoCAD a plus. Strong
