

Aviation socket three-level power distribution box

Aviation socket three-level power distribution box

The difference between the first, second, and third levels of

Third level distribution box: refers to the final junction box of each electrical appliance, which can be movable and fixed. Remember that the leakage protection switch is the last one, and

Aircraft Power Distribution

This distributed system allows for less wire throughout the aircraft, as well as aids in arc fault detection, replacement of many switches, relays, controllers, and contactors.
