

BMS Optical Cable

Overview

These cables offer reliable data transmission and connectivity, ensuring seamless compatibility and optimal performance in BMS installations. With high-quality materials and adherence to industry standards, BMS cables provide excellent signal integrity and durability. Our BMS cables, equivalent to Belden cables, are specifically designed for Building Management Systems (BMS) and automation applications. Connect BMS to cells, such as battery cell voltage&temperature sampling cable; 2. A Building Management System (BMS) is a network-based control system installed in buildings that control and monitors the building's mechanical and electrical equipment such as ventilation, lighting, power systems, fire systems, and security systems.

BMS Optical Cable

BMS Cable

BMS cable also commonly known as Building Management System cable, intelligent building cables or automation cables are used to automate all of the systems in
