

Base Station Energy Management System

Base Station Energy Management System

Mining Monitoring Solutions

Whether the project is focused on monitoring open-pit mines, tailing dams, or environmental compliance, Specto Technology offers comprehensive solutions

Product Composition Description

MINING - powermatix

PowerMatix understands the complex challenges of the mining sector, offering tailored automation and power management solutions to help you improve safety, boost productivity, and reduce operational

[Contact Us](#)

Telecom Base Station Energy & Environmental Monitoring

Remote monitoring is one of the most effective methods for improving base station maintenance efficiency. Traditional O& M models rely heavily on field visits, which are costly, time

[Contact Us](#)

Mine Wide Monitoring

A multichannel, battery-backed, 120 VAC powered remote station provides DC power for specialized sensors and enough I/O points for most applications. For example, the unit could monitor vibration,

[Contact Us](#)

Smart Energy Management System: Design of a

The main goal of this infrastructure is adding an artificial intelligence layer to energy use in an experimental open-pit mine and giving insights on

[Contact Us](#)

Empowering Mines with Smart Monitoring Solutions: Safety, Efficiency

Our product range is specifically designed to withstand harsh industrial environments, delivering accurate, near real-time data
