

Base station energy management system with low loss for use in oil and petrochemical industries

Overview

This paper establishes an energy router system for green and low-carbon base stations, a –48 V DC bus multi-source parallel system including photovoltaic, wind turbine, grid power, and energy storage batteries, and studies the control strategy managing system energy distribution. The PCS100 Reactive Power Conditioner is an electronic power factor correction system that uses an IGBT inverter to correct power factor, imbalance and low order harmonics (5th and 7th). It is an ideal solution in the oil and gas industry where expensive machinery must be protected and risk of. An online model installed at Repsol Cartagena refinery enables optimal balance between internal energy production and demand Diego Ruiz, Carlos Ruiz and Fernán serralunga Repsol Cartagena was the first oil refinery to be built on the Iberian Peninsula.
