

# Base station maintenance small square fiber optic cable

## Overview

---

The operations and maintenance team should: Use an anti-static vacuum cleaner to clean the floor under the server racks, fiber optic cable channels, and air vents; Regularly wipe the surfaces of fiber optic patch panels (ODFs) and patch panels; Seal spare fiber optic. Effective lifecycle management of fiber optic cables, from selection and installation to daily maintenance and replacement, is essential. This is the latest revision of a Recommendation that was first published in 1996. The information contained in this manual should serve as a guide to proper handling, installing, testing, and for troubleshooting problems with fiber optic cables.
