

Brazil ONU Optical Network Unit LPO

Sandblasting surface treatment process

Wear-resistant, waterproof, rust-proof, environmentally friendly, beautiful and generous, long service life

Overview

ANATEL published the new act 7869 with technical requirements for optical devices such as Optical Network Terminal (ONT), Optical Line Terminal (OLT), and an Optical Network Unit (ONU) for optical fiber networks with GPON, XGPON, and XGSPON standards. The transmitter uses a high-linearity driver chip to directly drive the optical modulator, converting the electrical signal into an optical signal. ONU Equipment by Application (Family, Industry, Other), by Types (EPON ONU, GPON ONU), by North America (United States, Canada, Mexico), by South America (Brazil, Argentina, Rest of South America), by Europe (United Kingdom, Germany, France, Italy, Spain, Russia, Benelux, Nordics, Rest of Europe). It supports 1000Base-PX20+ standard with 1:64 maximum optical splitting ratio and 20km distance.
