

Cable tray conversion not displayed

Overview

To enable the correct display, perform the following steps: In the project select the Cable Tray Fitting Family. To install a new version of your Autodesk software, open the Autodesk desktop app, sign in, and click My Products. I have automatic fittings turned on and fittings loaded (outside vertical, inside vertical, horizontal) and whenever I try to model a tray run w/ automatic fitting I get: The routing solution failed because there is no default fitting type specified or the fitting cannot be found in the project. This is another example of the new element creation paradigm instead of the creation document classAutodesk.
