

# **Cable tray steel structure installation price**

## Overview

---

Cable tray pricing varies significantly based on configuration: ladder-style trays (\$3-12/ft), trough systems (\$8-18/ft), and solid-bottom variants (\$10-25/ft). Cable trays are vital in electrical installations, providing secure pathways for power, communication, and control cables across residential, commercial, and industrial settings. As the cost of structural steel continues to increase, the impact of reducing the quantity of supports on a project can offset the cost of the cable ladder system all together. Cable tray pricing depends on materials, coatings, size, supplier margins, and order quantity —plus hidden costs like shipping and installation. This guide breaks down everything buyers need to know, from price trends to cost-saving tips.

## Cable tray steel structure installation price

---

### A T& B Cable Tray Metallic cable tray

Extensive experience has shown that the overall cost of a cable tray installation (including conductor, material and installation labor costs) may be as much as 60% less than a comparable conduit wiring
