

# **Can I change the router for my mobile fiber broadband connection**

## Overview

---

When switching to fiber internet, many users wonder if they're able to use their own router instead of the one provided by their internet service provider (ISP). In this guide, we'll explain router compatibility, setup steps and whether upgrading your router is necessary to maximize fiber speeds. Don't worry—you don't need to be an IT expert to get your new router up and running. But they don't tend to recommend it and some warn that it will make it more difficult for them to help if you encounter a fault.
