

Can a burned fiber optic cable be repaired

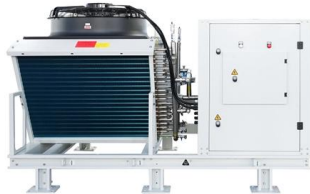

Overview

With the right tools and techniques, you can efficiently repair damaged fiber cables and restore reliable performance. While a cut or damaged fiber optic cable can temporarily take your network down, it is possible to quickly fix the cable with the right tools. Fibre is often made of extremely thin strands of glass so if it is damaged in a particular area, then that section needs to be removed, and the remaining fibre would need to be carefully re-spliced.
