

Can fiber optic cables be used without a router

Overview

While fiber internet doesn't require a modem, you still need a router to distribute the connection across your network. Your router works hand-in-hand with the ONT, taking the internet signal and spreading it wirelessly or through Ethernet cables to all your connected devices. The answer is actually no—fiber optic equipment differs significantly from cable setups. Your ONT handles signal conversion, eliminating the need for a traditional modem altogether. Think of the ONT as a high-tech bridge between your ISP and your internal network - but engineered specifically for fiber's unique data. With fiber optics, you can experience download and upload speeds that can reach up to 1 Gbps (gigabit per second) or higher, making it ideal for activities such as streaming 4K videos, online gaming, and running smart home devices.

Can fiber optic cables be used without a router

Does Fiber Internet Need a Modem? , Infinium Guide

To put it simply, fiber internet doesn't need a modem, but it does need an ONU and a router that can handle fiber. If you have the right tools, you can get the most out

50KW modular power converter

Flexible Configuration

- Modular Design, Expanding as Required
- Small/light, Well-Mounted
- Installed in Parallel for Expansion

Powerful Function

- Support PV+ESS
- Grid Support, Equipped with SVG Technology
- On-Grid and Off-Grid Operation

Reliable Protection

- Outdoor IP55 Design
- Sufficient Protection Functions Equipped
