

Can the fiber optic cable for the anchor be plugged into the router

Overview

The fiber optic cable does not plug directly into a standard home router because the signal type must be translated. The fiber line terminates at the Optical Network Terminal (ONT), which is typically supplied and installed by the internet service provider. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid. Understand the Basics Before diving in, familiarize yourself with the components involved:.
