

Canadian export price of optoelectronic integrated remote monitoring system CIF price

Overview

Average system pricing for a fully integrated multi-parameter monitor (hardware plus first-year software license) ranges from CAD 35,000 to 65,000 per transformer, with standalone DGA monitors priced between CAD 12,000 and 22,000 per unit. The International Trade centre has created a range of market analysis tools for developing countries - Trade Map, Market Access Map, Investment Map and Standards Map to help users examine the export and import statistics of over 220 countries and territories to better understand supply and demand. The Canada and the World Statistics Hub makes it easier for users to find and analyze the wealth of information that Statistics Canada publishes related to Canada's economic and financial activity with the world, including the United States. Growth is being driven by surging demand for high-resolution displays, LED lighting, LiDAR systems, and energy-efficient devices. The global remote monitoring and control market size was estimated at USD 23,868. Although the automotive market outlook remains positive, LED companies should be mindful of.
