

Cannot find the size of the distribution box

Overview

If all miniature circuit breakers are determined according to the number of digits (each 18 mm), PZ series distribution box has a fixed size. This suggests that the "mailbox full" warning isn't for an individual member, but rather for a separate mailbox associated with the group itself. When the electric box is only a lighting electric box or a small power, and the incoming line is less than 10 square, if the number of switch digits is less than 20, the width of the switch is added and 20mm on each side is the width of the electric box, and the height is the switch height Add. How to design distribution box or DB size ?
