

Carrier-grade router

Overview

Carrier Routing System (CRS) is a modular and distributed developed by that enables service providers to deliver data, voice, and video services over a scalable IP Next-Generation Network (NGN) infrastructure. In a network topology, these routers are generally positioned in the core or edge of a service provider network.

Carrier-grade router

MX Series Routers , HPE Juniper Networking US

Transform your business with MX Series universal routers. The AI-native platform provides industry-leading system capacity, density, automation, and performance.
