

Certified Active Optical Device 400G

Overview

The 400G QSFP-DD AOC (active optical cable) is a 400 Gb/s parallel active optical cable, which transmits parallel 8×50 Gb/s PAM4 signals over multi-mode fiber (MMF) cables up to 100m. Thin and lightweight AOC cables simplify cable management, enabling an efficient system airflow, which is. Based on the Spine-Leaf architecture, upgrading from 100G to 400G using NADDOD optical connectors can help customers reduce network costs, improve data transmission speed and data processing capabilities, while meeting the growing business demands, providing customers with a better network. 400G AOC Cables from JTOPTICS are Active Optical Cables that offer lightweight, flexible, and low-power connectivity. Designed for high-performance computing and networking environments, they enable fast data transfers with reduced electromagnetic interference. Built with bonded multi-mode or single-mode fiber, these cables deliver secure, low-latency.
