

Changing the IP address of a Siguangbadian switch

Overview

However, you can configure an IP address on a switch interface to change the switch management IP address. Each IP address can be assigned to specified interfaces or ports, Link Aggregation Groups (LAGs), or Virtual Local Area Networks (VLANs). However, to perform switch management over the network or use protocols such as SNMP, the switch will need to have an IP address. Then on the switch do: This should load the contents of the file into the running config and execute both the IP address change and default gateway (even if you get cut off. There are two keywords that you can specify for reload scheduling: Examples: The above.
