

Chile Construction Power Distribution Box

Overview

In January 2006, new legislation was passed to apply the benefits included in Short Laws I & II (see Recent Developments section below for details) to renewable energy production. geothermal, wind, solar, biomass, tidal, small hydropower and cogeneration) below 20 MW of capacity. Chile power strips and PDU power distribution units for surface mount, rack mount and general purpose applications. As of August 2020 Chile had diverse sources of electric power: for the National Electric System, providing over 99% of the country's electric power, hydropower represented around 26. Protected by a thick sheet metal casing, these distribution cabinets are designed for temporary installations and, thanks to double insulation, meet safety. Our advanced payment security system ensures confidentiality by encrypting your information during transmission using AES.

In January 2006, new legislation was passed to apply the benefits included in Short Laws I & II (see Recent Developments section below for details) to renewable energy production. The new regulation provided for exemptions in transmission charges for new renewable energy sources (i.e. geothermal, wind, solar, biomass, tidal, small hydropower and cogeneration) below 20 MW of capacity. It also simplified the legal procedures for projects below 9 MW. Previously, besides hydro, no other renewabl
