

Communication Radiology Station Tower

Overview

Radio masts and towers are typically tall structures designed to support antennas for telecommunications and broadcasting, including television. However, in structural engineering terms, a tower is a self-supporting or structure, while a is held up by stays or.

Communication Radiology Station Tower

Assessing the impact of radiofrequency radiation from cellular towers

Cellular communication towers, also referred to as base stations, transmit radiofrequency (RF) electromagnetic radiation (EMR) to facilitate wireless communication systems such as mobile
