

Connecting a PoE switch to an AP

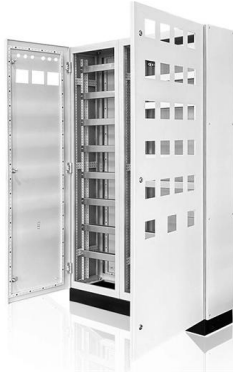

Overview

When using a wired connection, connect the client machine to the AP through either a PoE switch or an Injector. If using a PoE switch, plug an Ethernet cable into the AP's Ethernet jack and the other end into a PoE switch. Learn how to set up a Ubiquiti outdoor access point using a PoE switch and fiber connection. For PoE to work, the last device before the PD (powered device, in your case an access point) needs to be the PSE (power sourcing equipment, in your case the PoE "injector", also called a Midspan). Please note that product availability varies by region, and certain models may not be available in your. There are mainly two options for connect ExpertWiFi EBA63 with router, switch, or gateway, you can select either of the options.
