

D-light optical module

D-light optical module

Contents SECTION 10 TABLE OF CONTENTS

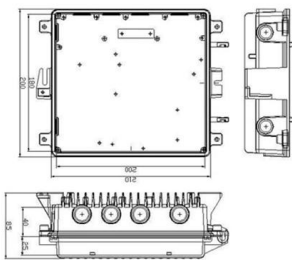

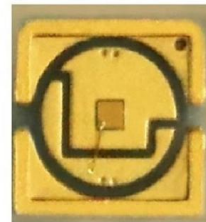

All the D-Lightsys® devices can be fully monitored and/or controlled through a I2C 2-wire serial interface and are suitable for a variety of applications:

TI DLP® System Design: Optical Module Specifications

The presentation provides a comprehensive overview of the guidelines specific to designing an optical system with DLP Products and enables customers throughout the design process. Please note that

Active Optics by D-Lightsys , Radiall

Radiall Active Optics and D-Lightsys© are optical transmitters, receivers and transceivers for harsh environments and demanding applications or markets.
