

DTU Integrated Distribution Box

Overview

It is a new generation of microcomputer-based distribution automation remote terminal devices that integrates telemetry, telesignaling, remote control, protection, and communication functions. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 - wherever passive distribution boxes are required. AD560 series of auto distribution terminal unit (DTU) are a new generation of auto DTU independently developed by Xiamen Huatech Switchgear Co. It is used to collect, process and analyze the real-time operation data (telemetry and telesignal) of power distribution network, which. DTU is a terminal device of a switching station, generally installed in conventional switching station, outdoor small switching station, ring network cabinet, small substation, box-type substation, etc. CMM, 2D Measurement instrument, Projector, Altimeter, Micrometer, Thread Gages, Hardness Tester, Calipers, Pin Gauge, Salt Spray Test Machine, Concentricity Measuring Instrument, Concentricity Measuring Instrument, Spectrometer.

DTU Integrated Distribution Box

Solid Rubber Distribution Box , DISTRO-DIRECT

Buy online: compact solid-rubber power distribution units offering high mechanical durability, operational safety, and quick access to internal protection via a flip cover.
