

Damage to Drop Fiber Optic Cable

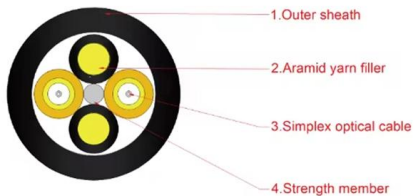

Overview

Connector Damage: Damaged terminations can cause unstable or interrupted signals. While these cables are engineered for durability (with some rated to last 25+ years), they are not invulnerable. Visual Fault Locator (VFL) - Injects a red laser (650 nm); light leakage indicates bend, crack, or break. Continuity test - Verify link from patch panel to transceiver with a short reference. So far, \$92,000 was the biggest reported amount spent by one telecom company on repairs of this kind. However, in real-world installations, whether underground, aerial, or in harsh industrial environments, fiber cables can and do fail.
