

Data Center Management Regulations

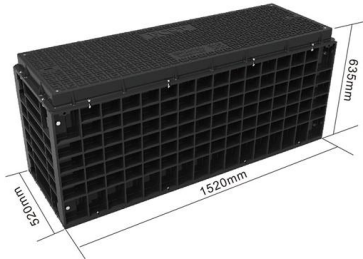

Overview

Data center siting, construction, and operation are subject to a growing range of EHS regulations and guidelines, demanding that data center owners and developers comply with evolving best practices in energy efficiency, e-waste management, water conservation, and noise and. Data centres are currently the dominant asset class for investments in digital infrastructure in the German market. Germany is one of the most important and fastest-growing markets for data centres in Europe, with a focus on Frankfurt (home to DE-CIX Frankfurt, the world's largest internet exchange. At its core lies the ISMS of ISO 27001 that integrates protection across organizational processes involving personnel or IT systems ensuring all-encompassing defense. On September 21, 2023, German Parliament passed the new Energy Efficiency Act ("EnEfG"). NIST, ITAR, HIPAA/HITECH, and PCI-DSS compliant data centers, cloud services, and colocation solutions, we hold an Authority to Operate (ATO) from multiple U.
