

# **Distribution Network Automation Management Solution**

## Overview

---

ADMS provides distribution utilities with real-time monitoring and control, network analysis, network optimization and outage management capabilities in an integrated software architecture, enabled by a high-performance, scalable, and cybersecure SCADA platform. Electric utility companies are under increasing pressure to improve reliability, minimize customer outages and optimize. A well-designed Distribution Automation (DA) system will help you get the most value out of assets such as voltage regulators' automated feeder switches, reclosers and capacitor banks.

## Distribution Network Automation Management Solution
