

Distribution box trips upon startup

Overview

Check the electrical load and ensure that the sensors do not exceed the 10 Amp maximum. Frequent tripping of your distribution box is a critical alarm, not just an annoyance. For facility managers, electricians, and project owners operating overseas—from industrial plants in the Middle East to solar farms in Southeast Asia—these unexpected shutdowns mean costly downtime, safety risks. A circuit breaker is a small device in your electrical panel, fuse box, consumer unit or trip switch box that protects your electrical installation from overload, electrical faults and serious damage.
