

Does a wireless router need to be connected to an optical fiber

Overview

A fiber wireless router is unnecessary for fiber Internet, but a traditional router will need an adapter to connect the optical network terminal to an Ethernet cable. A fiber Internet service like Google Fiber offers faster speeds, better reliability, and bigger bandwidths than. From the optical network terminal to the router that brings your home online, each piece plays a critical role in delivering the speedy, seamless experience fiber is known for. Let's take a closer look at the fiber to the home equipment you'll need and answer some of the most common questions about. Think of the ONT as a high-tech bridge between your ISP and your internal network - but engineered specifically for fiber's unique data.

Does a wireless router need to be connected to an optical fiber

Fiber Optic Router What is it and why do you need one?

A fiber optic router is able to get all of the fiber optic speed through to your network, whereas a non-fiber router isn't equipped for that. If you have fiber Internet
