

E-600 Spectrometer

Overview

The Thermo Scientific Evolution 600 is a dual beam scanning UV-vis spectrophotometer for routine use. It has a wavelength range from 190-900 nm and is equipped with variable slits for high resolution or high sensitivity absorbance measurements. The Evolution™ UV-Visible 300/600 spectrophotometer series is founded on the successful legacy of the Pye-Unicam, Bausch & Lomb, Philips Scientific, and Spectronic products. The Spectroquant Prove 600 plus provides high quality and great value for money for your daily analyses. The former is optimized for CW-EPR experiments at 94 GHz, while the E680 operates in both CW- and FT-mode.
