

East Africa Energy and Power Data Center

Overview

Tatu City, Kenya, 10 September 2025 – Home to Nxtra by Airtel's 44MW sustainable data centre, Tatu City Special Economic Zone has established itself as East Africa's data centre hub. Tatu City provides 95% renewable energy. Executives from Airtel Africa, Government representatives, and Rendeavour attended the official groundbreaking ceremony of the Nxtra by Airtel Africa data centre at Tatu City SEZ, Kenya. Data centre operators are building capacity to serve a fast-growing digital economy. Around the world, data centres are a hot new asset class. Country-level summary insights are available separately from the Digital Investment Facility team. For this iteration of the report, estimates cover five countries principally: Ethiopia, Kenya. Worldwide, uninterrupted power supply demand for IT equipment alone is forecast to reach 249 GW by 2030, with total installed capacity, including cooling and ancillary.
