

Egyptian optical cable suspension clamp

Overview

Assembly with reinforced suspension clamp and neoprene inner covering, especially designed for OPGW cables. The armour grip suspension is used for the movable suspension of conductors and optical fibre aerial cables on suspension mast. Optical Distribution Network (ODN) is composed of OLT and user equipment interconnected by optical fibers, splitters, and connectors, with downstream signal streams coming to the user interfaces and upstream signal streams for OLT processing purposes. We manufacture a wide range of hardware fittings for OPGW Optical Ground Wire, including Suspension and Tension Assemblies, Down Lead clamps, Earthing Clamps, Splice Enclosure, Reinforcing Rods, Vibration Dampers, etc. The FIBERLIGN Cushion Clamp uses a combination of structural reinforcing rods (SRR) and elastomer inserts at the ends of the clamp halves to protect the OPGW from damage at support points.
