

# **Energy storage cabinet with anti-tracking properties for emergency communication**

## Overview

---

This advanced solution features physical cabinet anti-theft measures, gyro-based theft detection, and software communication anti-theft capabilities. By establishing communication between the Battery Management System (BMS) and the controller, the battery becomes unusable. Designed for use in a climate controlled environment, it regulates temperature and provides active smoke monitoring with an alarm system. Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid.

## Energy storage cabinet with anti-tracking properties for emergency
