

European Technology Optical Module

Overview

ESTEL designs and manufactures high-performance optical transceivers in Europe and in the US, with local technical support and a secure supply chain. Our optical modules power demanding telecom and datacom networks across data centers, metro and long-haul links. The tasks and solutions are diverse and range from classic lenses and high-performance lighting modules to innovative solutions such as optical modules for wavefront manipulation. OptiTIM is a durable thermal interface material that can withstand the insertion and removal requirements of the pluggable module while.

European Technology Optical Module

Fibre Optic Transceiver Module & Cable Solutions

FS optical transceiver/cable solutions provide global telecom/data centre operators with ability to implement optical connectivity at data rates up to 400Gb/s and link distances up to 160km.
