

# **FC type in optical fiber cables**

## Overview

---

The FC connector is a with a threaded body, which was designed for use in high-vibration environments. A fiber optic connector is a mechanical device used to align and join optical fibers, enabling light to pass through with minimal loss. Each type varies by shape, polish (APC, PC, or UPC), and return loss performance, which affect PC, UPC, and APC Polish Styles: What's the.

## FC type in optical fiber cables

### **FC connector**

The FC connector is a fiber-optic connector with a threaded body, which was designed for use in high-vibration environments. It is commonly used with both single-mode optical fiber and polarization-maintaining optical fiber. FC connectors are used in datacom, telecommunications, measurement equipment, and single-mode lasers. They are becoming less common, displaced by SC and LC connectors. The FC connector h
