

Features of SMC Cable Trays

Overview

Solid side rail protection and system strength with smooth radius fittings and a wide selection of materials and finishes. Ladder cable tray is generally used in applications with intermediate to long support spans, 2.00mtrKaerda (Jiangsu Lantai) engineers its SMC Cable Tray systems to overcome the inherent limitations of traditional materials like sheet metal, thermoplastics, wood, or concrete, especially in demanding outdoor and industrial applications. But these traditional materials are not staying long in outdoor applications like subway, train, or power stations because of chemical corrosion, UV, acid rain, or dusty wind. Our SMC Cable Trays provide a robust and reliable solution for cable management in railway systems.
