

# Fiber Optic Cable Fusion Splice Loss Requirements

## Overview

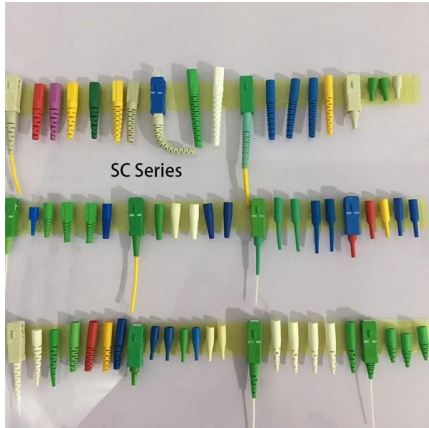

---

To be able to judge whether a fiber optic cable plant is good, one does a insertion loss test with a light source and power meter and compares that to an estimate of what is a reasonable loss for that cable plant. The estimate, called a "loss budget" is calculated using typical component losses for. The guide provides the complete workflow, covering safety precautions, tool selection, fiber preparation, fusion operation, quality control, and.

## Fiber Optic Cable Fusion Splice Loss Requirements
