

# **Fiber Optic Cable Numbering and Classification Standard Chart**

## Overview

---

This guide explains the latest EIA/TIA-598-D fiber color-coding standard used to identify fiber types, inner fiber sequences, and connector polish styles. With clear tables and updated details, it serves as a comprehensive reference for technicians handling modern fiber optic. Prysmian uses marks for counts 1 & 5 for 36-ribbon stacks and 1, 5 & 20 for 72-ribbon stacks. Written by Ben Hamlitsch, trueCABLE Technical and Product Innovation Manager RCDD, FOI

We are surrounded by colors. Hexatronic offers cables with color code systems according to all international and national standards and for all types of fiber optic such as a tube, ribbon, yarn wrapped bundle or other types of bundle. Fiber optic color knowledge is crucial for anyone working in telecommunications, networking, or data management.

## Fiber Optic Cable Numbering and Classification Standard Chart
