

# Fiber Optic Transceiver Patch Panel

## Overview

---

A fiber patch panel is a mounted enclosure—either rack-mounted or wall-mounted—used to terminate, manage, and interconnect multiple fiber optic cables. It acts as a hub for organizing splices and patch cords, streamlining fiber management and preserving signal integrity. The Cisco® solution of panel and cable assemblies offers versatile solution for any breakout from 4x10 Gbs to 400 Gbs native. The panels are compatible for Top of Rack (ToR), Middle of Rack (MoR), and End of Row (EoR) layouts. Full patching platforms include FX ECX for LAN environments, FX UHD for high-density fiber channels and the DCX System used primarily in data centers where high amounts of fiber connections and density are the key requirements, as in optical. Propel Series Sliding Fiber Optic Panels for holding Propel modules, adapter packs and splice cassettes EPX Fiber Optic Panel available in either G2 or LGX/PNL 1U, 2U or 4U fixed or sliding configurations FMT (Fiber Management Tray) Series Fiber Optic Panels FOMS-FPS and FOMS-FPS-HD Fiber.
