

Fiber optic cable 36b1 3

Overview

36-core armored duct fiber optic cable with steel tape protection, 25-year warranty. Outdoor armor designed for lashed aerial, duct, underground conduit environments, direct buried supported applications LAN Networks, Data communication, telecommunication, CCTV, network. The phosphide coating of phosphated steel wire can provide good lubrication and corrosion resistance, which can reduce the friction and wear of steel wire in the process of use, reduce energy loss and prolong the service life. 3-130- [155;85] is Optical Fiber Composite Overhead Ground Wire (OPGW - Layer Stranded Type) OPGW is primarily used by the electric utility industry, placed in the secure topmost position of the transmission line where it "shields" the all-important conductors from lightning while. Farnell's fibre optic cables are engineered to provide high-speed, high-bandwidth data transmission over long distances with minimal signal loss. Ideal for telecommunications, data centres and networking applications, our fibre optic cables are available in single-mode and multimode configurations.
