

Fiber optic cable model AdSS model

Overview

All-dielectric self-supporting (ADSS) cable is a type of that is strong enough to support itself between structures without using conductive metal elements.

All-dielectric self-supporting cable

Overview Construction details Accessories and installation Application issues

All-dielectric self-supporting (ADSS) cable is a type of optical fiber cable that is strong enough to support itself between structures without using conductive metal elements. It is used by electrical utility companies as a communications medium, installed along existing overhead transmission lines and often sharing the same support structures as the electrical conductors. ADSS is an alternative to OPGW and OPAC with lower installation cost. The cables are designed to be s
