

# Fiber optic cable type b1 3

## Overview

---

3 refers to the specific technical standard that governs the design and performance requirements for fiber optic cables used in various industries. OS1 or OS2 fiber for outdoor or indoor/outdoor applications is specified for a maximum attenuation of 0. A map illustrating the connection of IEC designations to ITU-T designations is shown in Annex I. This part of IEC 60793 is applicable to optical fibre categories B-652, B-653, B-654, B-655, B-656 and B-657. EasyBand® G657A1 bending insensitive single-mode fibre encompasses all the features of FullBand® fibre and provides good resistance to macro-bending. " The information contained in this document is valid and correct at the time of issue.
