

Fiber optic connection to router is unavailable

Overview

First, check the basics—look for power issues on your optical network terminal and inspect all cables for visible damage. Many fiber internet problems come from dirty connectors or loose plugs, not major faults. Fiber optic networks are celebrated for their speed and reliability, but even the best systems can encounter problems. This morning my ISP upgraded my Internet connection from a standard coaxial cable and Cisco modem to a fiber optic cable and Hitron modem Model Name NOVA-2004. For all broadband connectivity issues, please contact your broadband provider directly; this is the quickest way to identify and resolve service issues.
