

Fiber optic patch cord MT-FA

Overview

It widely used in Precision optical laser, and optical module for 40G,100G QSFP. Applications Whether you are upgrading to 40G QSFP+ or deploying a 100G backbone, our MT-based assemblies deliver the low insertion loss and high return loss required for mission-critical fiber optic links. Utilizes precision-molded MT ferrules for superior physical contact and signal alignment. Our portfolio includes single-channel, multi-channel, wavelength multiplexing, and coupling solutions, ideal for high-speed transceivers, TOSA/ROSA, and silicon. An MPO patch cord can support not only 8-core and 12-core, but breakout cable even 72-core or more fiber connections, which can meet the high-density transmission requirements of 40G and 100G fiber optic networks in data centers. HYC's MT-FA \square 42°/8° \square uses 42°total reflection FA as the RX receiving end to directly couple with the PD Array to complete the optical-to-optical conversion of the optical path; use the small size and multiple channels of the MT ferrule to realize the parallel transmission of multiple optical.

Fiber optic patch cord MT-FA

High Precision 8f 12f Fiber Optic Mt-Fa Ferrule Patch

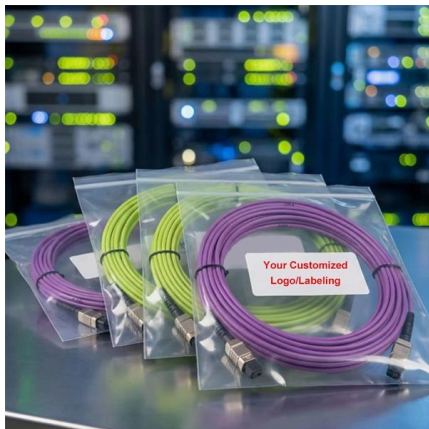

High Precision 8f 12f Fiber Optic Mt-Fa Ferrule Patch Cord for 40g/100g Optical Module, Find Details and Price about Mt-Fa Fiber Optic Coupler
