

Fiber optic pigtails and patch cord couplers

Overview

This guide covers everything: what fiber optic pigtails are, how they differ from patch cords, which connector and polish type to specify, how to choose between mechanical and fusion splicing, and the real-world applications where pigtails are the right call. They are the bridge between fiber optic cables in the field and the equipment or patch panels that manage them. By combining factory-installed connectors with spliced bare fiber, pigtails ensure that network installers can create. HCS DataLight Patch Cords and Pigtails series provides a full range of high quality assemblies, supporting all state-of-the-art connectors types, including ST, SC, SC/APC FC, FC/APC, LC and MT-RJ, MPO and MTP.
