

Fiberglass cable trays are composite cable trays

Overview

The fiberglass cable tray is a composite structural member with glass fiber as the reinforcing material and epoxy resin or polyester resin as the matrix, continuously formed through the pultrusion process. Enduro cable tray (sometimes called cable ladder) sets the industry standard for high-quality fiberglass cable tray. Made from the highest quality pultruded materials, our Fiber Reinforced Polymer (FRP) cable tray is extremely durable and resistant to chemical attack, with a proven record of. Its cross - section is usually designed as ladder - type, tray - type, or trough - type, with. FRP Cable Trays are non-metallic support systems for routing electrical and data cables in industrial and commercial facilities.
