

Fiji 24-core fiber optic cable splice package

Overview

This small horizontal fiber splice closure is a compact and durable enclosure designed to protect and manage fiber optic splices in small-scale outdoor deployments, supporting max 24 core splices. The optical cable connection box, also known as an optical cable joint box or barrel, is designed for various structural cables, including overhead, pipeline, direct burying, and other direct and branch connections. Made from imported PPR reinforced plastics, the box offers high strength, corrosion. **More Capacity and Versatility:** This product offers a high capacity of 12/24 cores for one unit, making it suitable for various fiber optic applications. Fiber optic splice tray with a 24 fiber capacity, offering a high-capacity solution for fiber splicing and organization. It is made of tough chemical resistant engineering material which effectively prevents it from ageing caused by heat, cold, oxygen and UV radiation.

Fiji 24-core fiber optic cable splice package

4 Core Loose Tube Fiber Optic Cable Manufacturing Process

Take a closer look at how 4 core loose tube fiber optic cables are manufactured in our workshop. From fiber stranding, sheath extrusion, water cooling, diameter measurement, surface treatment
